Sounds good and will do!

If the rest of the group has any comments on the latest draft, please let me know. Otherwise, I will have the attached update added to the M&H webpage.

I think it still makes sense to include some language on the M&H website ... there doesn't seem to be any harm in it

Thanks, Demaree. Since the residents are being directed to info about the fire, should we forego a M&H web update?

**Subject:** RE: Carus Chemical Press Inquiries (approval needed) and Updates

Hi all,

I am onsite and we are going to have a press event at 2:00. I don't believe at this time that any of the events regarding the fire at Carus Chemical yesterday have impacted the cleanup in the residential area. We are still doing continuous air monitoring and some limited monitoring of the river, which have not shown any contamination from the fire event. There was some limited fall out of the potassium permanganate and particulates, but it seems to be in a very limited area and the substance is fairly inert at the very low levels they were released. Carus Chemical intends to develop a plan to address the fallout in the surrounding area and they have set up a hotline for residents to call. If we get calls where people specifically ask about their property's cleanup and how this may affect it, let me know and we can come up with a more formulated answer.

Demaree

**Subject:** RE: Carus Chemical Press Inquiries (approval needed) and Updates

Thanks, Jeff. I struggled with that as well. I was worried that "at this time" could be interpreted as there is a possibility that the fire could've impacted the SFD site. But leaving it out could turn out to be an inaccurate statement later on.

I agree that we should see what Demaree's thoughts are since she's on-site to verify.

A few more edits from me. I'm not sure we should say that the fire hasn't affected the residential cleanup, since I'm not sure if we know that yet ... I suppose we could say that "at this time" there's no indication it affected the cleanup, or maybe we shouldn't say anything until we know for certain? I'll defer to Demaree on this, since I know she's on-site checking things out this morning.

I'm ok leaving out the river mitigation response and adding your highlighted suggested edit. If IEMA is in the lead then yes, I would like to include that. Should we wait for Rob before sending?

Hi Rachel,

I think this looks good, however to my knowledge there are currently no mitigation efforts to the Little Vermillion River, so maybe hold off on that. Do we want to say that IEMA is the lead or no?

"EPA is currently en route to the site. The agency is not the lead for the fire. We defer to local authorities responding to the fire to answer any questions about fire-fighting runoff and information provided to local residents."

**Subject:** Carus Chemical Press Inquiries (approval needed) and Updates

I have some press updates and response approval needed below. Is this the right group to email? Below are some questions from NBC News and my proposed response. Any edits? Jeff Kelley approved. I also reached out to IEPA's PIO, they have heard from: AP, Chicago media, and the BBC. I let them know we heard from NBC News and the NY Times. IEPA anticipates they will arrive at the same time as Rob.

**From the reporter:**

We understand The Little Vermillion River is behind the plant can you speak to any mitigation efforts on that front as well as a tributary to the Illinois River? Anything homeowners should do? We have been told that this is something local people should do from the La Salle police department . is this what you recommend?

"Due to recent events, an oxidizer (which appears green in color) has been released in the area. Do NOT touch this substance. If you see this substance near or on your residence it can be deactivated.

In order to deactivate it, you will need a 1:1:1 mixture of: 1 gallon of water, 1 gallon of peroxide, 1 gallon of vinegar.

At this time, we are asking that LaSalle residents continue to shelter in place."

**Proposed response:**

EPA is currently en route to the site. The agency is not the lead for the fire. We defer to local authorities responding to the fire to answer any questions about mitigation efforts at the Little Vermillion River and information provided to local residents.
